Microsoft 2013 and its alternatives.

Whats new with Office 2013? – Microsoft have changed the way Office looks again. Yhey did this before in Office 2007. Fortunately, [Microsoft have provided free training to help you adapt](#). Woody Leonard has an article called “[Surviving your first hour with Office 2013](#)” that should help too.

Is Office 2013 suitable for you? [PCWorld has an article](#) that addresses this question before you part with your money.

What are the alternatives? There are free programs like [LibreOffice and OpenOffice](#). There are free online office suites like [Google Docs/Drive](#), [Microsoft Web Apps](#), and [MediaFire](#) which is powered by [Zoho](#).

Here's a [comparison article on several of these office alternatives](#).

I have a Mac. Check out [NeoOffice](#), [LibreOffice](#), and [OpenOffice](#) and all the online office suites will work with Macs.

Also see [our article on free software](#).
